

## 2022 sujet 26

**Exercice 1**

```
def RechercheMin(tab):  
    indice = 0  
    mini = tab[0]  
    for i in range(len(tab)):  
        if tab[i] < mini:  
            indice = i  
            mini = tab[i]  
    return indice
```

**Exercice 2**

```
def separe(tab):  
    i = 0  
    j = len(tab) - 1  
    while i < j :  
        if tab[i] == 0 :  
            i = i + 1  
        else :  
            tab[i], tab[j] = tab[j], tab[i]  
            j = j - 1  
    return tab
```
